Notes to the interim financial statements

1. GENERAL INFORMATION

Multi Strategy Alternatives Fund (the “Fund”) is structured as a contractual fund with an open-ended redemption structure under Dutch law, and was established on 30 July 2014. The Fund is a closed fund for joint account (*besloten fonds voor gemene rekening*) and is not a legal entity but a contractual arrangement *sui generis* between the Fund Manager, the Legal Owner and each participant. The Fund commenced operations on 15 January 2015.

The Fund may issue Class A participations and Class B participations. As at 30 June 2015, only the Class A participations are in issue.

The investment objective of the Fund is to achieve long term growth by investing in a diversified portfolio of investee funds worldwide, predominantly hedge funds. When selecting investee funds, the Fund Manager will focus on fund managers that manage at least EUR 100,000,000 in the same strategy. The aim is to avoid illiquid strategies and illiquid investment funds.

The Fund’s investment activities are managed by Privium Fund Management B.V. (the “Fund Manager”), with the administration delegated to TMF Custom House Global Fund Services (the “Administrator”).

The Fund had no employees during the period ended 30 June 2015.

The Fund Manager is subject to supervision by the AFM (Stichting Autoriteit Financiële Markten) and DNB (Central Bank of the Netherlands). On 22 July 2014, the AFM licence of the Fund Manager was automatically converted into an Alternative Investment Fund Managers Directive (“AIFMD”) licence by the AFM.

The interim financial statements have been authorised for issue by the Fund Manager on 31 August 2015.

2. SIGNIFICANT ACCOUNTING PRINCIPLES AND POLICIES

Basis of preparation

The interim financial statements of the Fund have been prepared in accordance with reporting principles generally accepted in The Netherlands (“Dutch GAAP”) and the statutory provisions concerning annual accounts contained in Part 9, Book 2 of the Dutch Civil Code and Dutch Accounting Standard 394.

The interim financial statements are prepared on a fair value basis for financial investments, except those for which a reliable measure of fair value is not available. Other financial assets and liabilities and non-financial assets and liabilities are stated at amortised cost or historical cost.

These interim financial statements are prepared for the period from date of commencement of operations on 15 January 2015 to 30 June 2015. Below is a summary of the accounting policies of the Fund.

Functional currency

The interim financial statements are presented in United States Dollar (“USD”), which is the Fund’s functional currency.

Recognition and measurement

An asset is recognised in the balance sheet when it is probable that future economic benefits of the asset will flow to the Fund and the amount of the asset can be reliably measured. A liability is recognised in the balance sheet when it is probable that an outflow of resources embodying economic benefits will result from the settlement of a present obligation and the amount at which the settlement will take place can be measured reliably. Income is recognised in the income statement when an increase in future economic benefit related to an increase in an asset or decrease in a liability has arisen that can be measured reliably.

Expenses where applicable) are recognised in the income statement when a decrease in future economic benefit related to a decrease in an asset or an increase in a liability has arisen that can be measured reliably.

Notes to the interim financial statements

2. SIGNIFICANT ACCOUNTING PRINCIPLES AND POLICIES (*CONTINUED*)

Estimates

The preparation of interim financial statements in conformity with the relevant rules requires the use of certain critical accounting estimates. It also requires management to exercise its judgement in the process of applying the Fund's accounting policies. If necessary, for the purposes of providing the view required under Section 362, subsection 1, Book 2 of the Dutch Civil Code, the nature of these estimates and judgements, including related assumptions, is disclosed in the notes to the interim financial statements in question.

Foreign exchange

Transactions in foreign currency are converted at the rates prevailing on the date of the transaction. Monetary assets and liabilities denominated in currencies other than USD are converted to USD at the exchange rates prevailing on the balance sheet date. Foreign currency exchange gains and losses resulting from the settlement of such transactions and from the translation at period end exchange rates are recognised in the income statement. Translation differences on non-monetary assets held at cost are recognised using the exchange rates prevailing at the dates of transactions.

Translation differences in non-monetary assets such as investment in investee funds held at fair value through profit or loss are recognised through profit or loss as part of the fair value gain or loss.

Classification of participations

The participations of the Fund are classified as equity. These participations are recognised and measured at the redemption amount. Any distribution of equity is recognised through equity.

Basis of valuation - policies in preparing the balance sheet

Financial investments and financial derivatives are initially measured at fair value which is the fair value of the consideration given or received. Financial investments are subsequently re-measured at fair value.

Gains and losses arising from fair value changes are recognised in the income statement as 'realised losses on investee funds' or 'unrealised losses on investee funds'.

The Fund's investments in investee funds are valued based on the reporting received from the administrators of those funds. As at the 30 June 2015, the value of investments in investee funds is the aggregate of the Fund's attributable share of the latest available (unaudited) NAV of the investee funds.

The profit or loss of the Fund on its investments in investee funds is the aggregate of the Fund's attributable share of the result of the hedge funds. The Fund Manager may, if it thinks fit, make adjustments as a result of the different bases of determination of results applied by the hedge funds.

Where an up-to-date value of an underlying investment is not available, or the valuation date does not coincide with that of the Fund, the Fund Manager will use an estimated value.

Receivables and prepayments

The value of accounts receivable and prepaid expenses will be deemed to be the full amount unless it is unlikely to be paid or received in full. Appropriate allowances for estimated irrecoverable amounts are recognised in the income statement when there is objective evidence that the asset is impaired. Cash is carried at face value.

Payables and accruals

Payables and accruals and deferred income are included at fair value.

Cash and cash equivalents

Cash comprises cash on hand and demand deposits. Cash equivalents are short-term, highly liquid investments that are readily convertible to known amounts of cash and which are subject to insignificant changes in value and are held for the purpose of meeting short-term cash commitments rather than for investment or other purposes.

Notes to the interim financial statements

2. SIGNIFICANT ACCOUNTING PRINCIPLES AND POLICIES (CONTINUED)

Statement of cash flows

The statement of cash flows is prepared according to the direct method. The statement of cash flows shows the Fund's cash flows for the period divided into cash flows from operations and financing activities and how the cash flows have affected cash funds.

For the purposes of the statement of cash flows, financial instruments at fair value through profit or loss are included under operating activities. Cash flows from financing activities include proceeds from subscriptions and payments for redemptions of shares of the Fund. As the nature of the Fund is to invest in financial instruments, all cash flows related to investments are classified as cash flows from operating activities.

Principles for determining the result

The Fund recognises financial assets and financial liabilities on the date it becomes a party to the contractual provisions of the instrument. A regular way purchase and sale of investments is recognised using trade date accounting.

The changes in value of the investments held by the Fund are accounted for in the income statement.

Expenses are accounted for in the income statement on the accrual basis.

Tax position

The Dutch tax authorities have granted a ruling confirming that the Fund is tax transparent. This implies that the Fund is not subject to corporate income tax. Distributions made by the Fund (for example in case of redemption by a participant) are not subject to dividend withholding tax.

7. Share capital

Structure of the Fund's capital

Multi Strategy Alternatives Fund is structured as a contracted Fund with an open-ended redemption structure which is subject to Dutch law. The Fund may issue Class A participations and Class B participations. Both Classes are subject to the same investment objective and investment strategy. The sole difference between the different Classes is that Class A participants will pay a lower management fee, due to the fact that the Investment Advisor will waive its advisory fee that is payable out of the management fee for Class A. Only investors that are a client of the Investment Advisor shall be issued Class A participations against each such participants' individual subscription. Other participants subscribing will be issued Class B participations, unless otherwise determined by the Fund Manager in its sole discretion. The holders of Class A participations at any time wishing to increase their subscriptions, shall be issued Class A participations. As at 30 June 2015, Class A participations are in issue.

Subscriptions and redemptions

Participants can, at the sole discretion of the Fund Manager, subscribe to the Fund on a monthly dealing day at the subscription price. The minimum initial subscription for each participant is USD 100,000. Participations were issued at an initial subscription price of USD 100 per participation and thereafter at the net asset value ("NAV") per participation.

The Fund will enable participants to redeem participations at the NAV on the first business day of each calendar month ("redemption day"). The Administrator must receive the redemption request in proper form at least 2 months before the relevant redemption day. The Fund Manager may decide, in its sole discretion to accept redemption notices which are not received in a timely manner.

The movement of the participations during the period ended 30 June 2015 was as follows:

	Participations at the beginning of the period	Participations issued	Participations redeemed	Participations at the end of the period
Class A participations	-	1,001,611.135	(7,663.291)	993,947.844

Capital management

The Fund's objectives when managing capital are to safeguard the Fund's ability to continue as a going concern in order to provide returns for participants and benefits for other stakeholders and to maintain an optimal capital structure to reduce the cost of capital. In order to maintain or adjust the capital structure, the Fund does not intend to pay dividends. All earnings will normally be retained for investments. However, the Fund reserves the right to declare dividends or make distributions if the Fund Manager so decides.

11. RELEVANT CONTRACTS

Fund Manager

Management fee

Privium Fund Management B.V. acts as the Fund Manager to the Fund. The Fund Manager is entitled to an annual management fee of 0.09% of the NAV of Class A participations and 1.09% of the Nav of Class B participations as at the last business day of each calendar month. The management fee is calculated monthly and payable monthly in arrears. Details of management fees charged for the period are disclosed in the income statement.

Administrator

The Fund has entered into an administration agreement with TMF Custom House Global Fund Services. The Administrator charges an annual fee of 0.04% of the NAV, as of the last calendar day of each month, subject to an annual minimum fee of EUR 20,000 (excluding VAT). The fee is calculated quarterly and paid quarterly in arrears.

The Administrator also charges a fee of EUR 3,500 per annum for the preparation of the financial statements.

Details of administration fees charged for the period are disclosed in the income statement.

Custodian

ABN AMRO Clearing Bank N.V. acts as custodian to the Fund. The custodian is entitled to receive fees from the Fund in accordance with its customary charges.

Depositary

Darwin Depository Services B.V. (the "Depositary") charges an annual fee of EUR 15,000, (excluding VAT), in remuneration for its service to the Fund. The fee is payable quarterly in advance. In addition, the Fund was charged EUR 3,000 for the on-boarding process.

12. RELATED PARTY TRANSACTIONS

Related party transactions are transfers of resources, services or obligations between related parties and the Fund, regardless of whether a price has been charged. Parties are considered to be related if one party has the ability to control the other party or exercise significant influence over the other party in making financial or operational decisions or is part of key management of the Fund. The following provides details on the related parties of the Fund and transactions with the related parties.

The Fund Manager is considered a related party.

The following transactions occurred between the Fund and the Fund Manager during the reporting period.

	Paid	Balance
	USD	USD
Management fee	(22,971)	(14,954)

Notes to the interim financial statements

13. FINANCIAL INVESTMENTS AND ASSOCIATED RISKS

The investment objective of the Fund is to achieve long term growth by investing in a diversified portfolio of investee funds worldwide, predominantly hedge funds. When selecting investee funds, the Fund Manager will focus on fund managers that manage at least EUR 100,000,000 in the same strategy. The aim is to avoid illiquid strategies and illiquid investment funds.

The Fund's activities expose it to a variety of financial risks: market risk (including market price risk, interest rate risk and currency risk), credit risk and liquidity risk.

Market risk

Market risk is the risk that the fair value of future cash flows of a financial instrument fluctuates as a result of changes in market prices whether those changes are caused by factors specific to the individual security or its issuer or factors affecting all securities traded in the market. Market risk comprises market price risk, interest rate risk and currency risk.

Market price risk

Price risk is the risk that the value of the instrument will fluctuate as a result of changes in market prices (other than those arising from interest rate risk or currency risk), whether caused by factors specific to an individual investment, its issuer or all factors affecting all instruments traded in the market.

As at 30 June 2015, price risk arises on the Fund's investments in investee funds.

Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Fund has no interest bearing financial instruments except for cash at banks and amounts due from/to broker which are subject to normal market related short-term interest rates. Therefore the Fund is not exposed to significant interest rate risks.

Currency risk

Currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates. Currency risk exposure arises from the Fund investing in financial instruments and entering into transactions which are denominated in currencies other than its functional currency. The Fund's exposure to foreign exchange movements at 30 June 2015 is as follows:

	2015	
	Fair value	% of
	USD	NAV
Currency		
Euro	(280,348)	(0.3)

Credit risk

Credit risk is the risk that a counterparty to a financial instrument will fail to discharge an obligation or commitment that it has entered into with the Fund. It arises from cash and cash equivalents and other receivables. The carrying values of financial assets (excluding any investments in investee funds) best represent the maximum credit risk exposure at the reporting date and amounts to USD 4,993,503.

Notes to the interim financial statements

13. FINANCIAL INVESTMENTS AND ASSOCIATED RISKS (CONTINUED)

Liquidity risk

Liquidity risk is the risk that the Fund will encounter difficulty in meeting obligations arising from its financial liabilities.

The Fund's Prospectus provides for the monthly creation and cancellation of participations and it is therefore exposed to the liquidity risk of meeting participations redemptions. The Fund's policy only allows for redemptions on the last day of each calendar month and notice of 2 months must be provided.

The Fund is exposed to liquidity risk as the investments of the Fund in investee funds cannot immediately be converted into cash. The liquidity risk involved with the investee funds will be dependent on the redemption policies of the individual investee funds. Some of the investee funds may be or become illiquid, and the realisation of investments from them may take a considerable time and/or be costly. The Fund's investments in such investee funds may not be readily realisable and their marketability may be restricted, in particular because the investee funds may have restrictions that allow redemptions only at specific infrequent dates with considerable notice periods, and apply lock-ups and/or redemption fees.

The liquidity risk is significantly reduced because the Fund diversifies its investments across different investee funds.

The Fund's other liabilities are short-term in nature.

14. NET ASSET VALUE AS ISSUED

The following schedule shows the reconciliation between the equity in accordance with the Prospectus and the equity as determined in accordance with Dutch Accounting Standard 210 ("Dutch GAAP").

The Prospectus states that incorporation costs should be amortised over 5 years. Dutch GAAP prefers that incorporation costs be expensed immediately.

	30 June 2015
	USD
Net assets attributable to holders of participations in accordance with the Prospectus	99,334,605
Adjustments	
Unamortised incorporation costs	(45,031)
Adjusted net assets attributable to holders of participations in accordance with Dutch GAAP	<u>99,289,574</u>
