Notes to the interim financial statements

1. GENERAL INFORMATION

Still Equity Fund (the “Fund”) is an open-ended fund for joint account (“*fonds voor gemene rekening*”). Under Dutch law, the Fund is not a legal entity but an agreement *sui generis* between the Fund Manager, the Title Holder and each of the unitholders. The Fund was incorporated on 23 January 2015 and commenced operations on 01 April 2015.

As at 30 June 2016 and 31 December 2015, the Fund was offering one class of units. The units of the Fund are not listed on any stock exchange.

The investment objective of the Fund is to outperform the MSCI Europe index on a rolling five year basis. The Fund aims to achieve this outperformance with a lower volatility than that of the index.

The Fund’s investment activities are managed by Privium Fund Management B.V. (the “Fund Manager”), with the administration delegated to Custom House Fund Services (Netherlands) B.V. (the “Administrator”).

The Fund had no employees during the period ended 30 June 2016 or the year ended 31 December 2015.

The Fund Manager is subject to supervision by the AFM (Stichting Autoriteit Financiële Markten) and DNB (Central Bank of the Netherlands). On 22 July 2014, the AFM licence of the Fund Manager was automatically converted into an Alternative Investment Fund Managers Directive (“AIFMD”) licence by the AFM.

The interim financial statements have been authorised for issue by the Fund Manager on 11 August 2016.

2. SIGNIFICANT ACCOUNTING PRINCIPLES AND POLICIES

Basis of preparation

The interim financial statements of the Fund have been prepared in accordance with reporting principles generally accepted in the Netherlands (“Dutch GAAP”) including the guidelines for annual reporting (RJ) 615 and the statutory provisions concerning annual accounts contained in Part 9, Book 2 of the Dutch Civil Code and Dutch Accounting Standard 394.

The interim financial statements are prepared on a fair value basis for financial investments, except those for which a reliable measure of fair value is not available. Other financial assets and liabilities and non-financial assets and liabilities are stated at amortised cost or historical cost.

These are the second interim financial statements of the Fund. The comparative figures reflect the period from commencement of operations on 01 April 2015 to 30 June 2015 and are therefore not entirely comparable with the current reporting period included in these interim financial statements.

Below is a summary of the accounting policies of the Fund.

Functional currency

The interim financial statements are presented in EUR, which is the Fund’s functional currency.

Recognition and measurement

An asset is recognised in the balance sheet when it is probable that future economic benefits of the asset will flow to the Fund and the amount of the asset can be reliably measured. A liability is recognised in the balance sheet when it is probable that an outflow of resources embodying economic benefits will result from the settlement of a present obligation and the amount at which the settlement will take place can be measured reliably. Income is recognised in the income statement when an increase in future economic benefit related to an increase in an asset or decrease in a liability has arisen that can be measured reliably.

Notes to the interim financial statements

2. SIGNIFICANT ACCOUNTING PRINCIPLES AND POLICIES (*CONTINUED*)

Recognition and measurement (*continued*)

Expenses (including value added tax ("VAT"), where applicable) are recognised in the income statement when a decrease in future economic benefit related to a decrease in an asset or an increase in a liability has arisen that can be measured reliably.

Estimates

The preparation of interim financial statements in conformity with the relevant rules requires the use of certain critical accounting estimates. It also requires management to exercise its judgement in the process of applying the Fund's accounting policies. If necessary, for the purposes of providing the view required under Section 362, subsection 1, Book 2 of the Dutch Civil Code, the nature of these estimates and judgements, including related assumptions, is disclosed in the notes to the interim financial statements in question.

Foreign exchange

Assets and liabilities denominated in currencies other than the EUR are converted to EUR at the exchange rates prevailing on the balance sheet date. Transactions in foreign currency are converted at the rates prevailing on the date of the transaction. Foreign currency exchange differences arising on translation and realised gains and losses on disposal or settlement of monetary assets and liabilities are recognised in the income statement.

Classification of units

The units of the Fund are classified as equity. These units are recognised and measured at the redemption amount. Any distribution of equity is recognised through equity.

Basis of valuation - policies in preparing the balance sheet

Financial investments are initially measured at fair value which is the fair value of the consideration given or received. Financial investments are subsequently re-measured at fair value.

The Fund measures the fair value of any security which is listed or quoted on any securities exchange or similar electronic system and regularly traded thereon using its last traded price on the relevant business day. If no trades occurred on such day, it will be valued at the closing price on the previous business day.

Gains and losses arising from fair value changes are recognised in the income statement as 'realised (losses)/gains in equities' or 'unrealised losses in equities'.

Receivables

The value of accounts receivable will be deemed to be the full amount unless it is unlikely to be received in full. Appropriate allowances for estimated irrecoverable amounts are recognised in the income statement when there is objective evidence that the asset is impaired. Cash is carried at face value.

Payables and accruals

Payables and accruals and deferred income are included at fair value.

Cash and cash equivalents

Cash comprises cash on hand and demand deposits. Cash equivalents are short-term, highly liquid investments that are readily convertible to known amounts of cash and which are subject to insignificant changes in value and are held for the purpose of meeting short-term cash commitments rather than for investment or other purposes.

Statement of cash flows

The statement of cash flows is prepared according to the direct method. The statement of cash flows shows the Fund's cash flows for the period divided into cash flows from operating and financing activities and how the cash flows have affected cash funds.

Notes to the interim financial statements

2. SIGNIFICANT ACCOUNTING PRINCIPLES AND POLICIES (CONTINUED)

Statement of cash flows (continued)

For the purposes of the statement of cash flows, financial instruments at fair value through profit or loss are included under operating activities. Cash flows from financing activities include proceeds from subscriptions and payments for redemptions of shares of the Fund. As the nature of the Fund is to invest in financial instruments, all cash flows related to investments are classified as cash flows from operating activities.

Unitholders' equity

All references to net asset value ("NAV") throughout the interim financial statements are equivalent to unitholders' equity.

Principles for determining the result

The Fund recognises financial assets and financial liabilities on the date it becomes a party to the contractual provisions of the instrument. A regular way purchase and sale of investments is recognised using trade date accounting.

The changes in the value of the investments held by the Fund are accounted for in the income statement. The Fund may use forward currency contracts to limit the exchange rate risk. Forward currency contracts are accounted for as currency transactions. The change in value of forward currency contracts are also accounted for in the income statement.

Dividend income related to exchange-traded equity investments is recognised in the statement of comprehensive income on the ex-dividend date.

Expenses are accounted for in the income statement on an accrual basis. Transaction costs in relation to equities are capitalised while transaction costs in relation to forward currency contracts are expensed immediately.

Tax position

The Fund has the status of a fiscal investment institution ("FBI"), pursuant to Article 28 of the Dutch Corporate Income Tax Act 1969. The status of a FBI results in the Fund not being subject to corporate income tax.

Dividend distributions of the Fund are subject to 15% Dutch dividend withholding tax on dividends paid to the unitholders. However, the Fund can apply a remittance reduction on this dividend tax.

The Fund's investment objective is to outperform the MSCI Europe index on a rolling five year basis. The Fund aims to achieve this outperformance with a lower volatility than that of the index.

The Fund's activities expose it to a variety of financial risks: market risk (including market price risk, interest rate risk and currency risk), credit risk and liquidity risk.

Market risk

Market risk is the risk that the fair value or future cash flows of a financial instrument may fluctuate as a result of changes in market prices whether those changes are caused by factors specific to the individual security or its issuer or factors affecting all securities traded in the market. Market risk comprises market price risk, interest rate risk and currency risk. The Fund's market risk is managed through diversification of its investments.

Market price risk

Price risk is the risk that the value of the instrument will fluctuate as a result of changes in market prices (other than those arising from interest rate risk or currency risk), whether caused by factors specific to an individual investment, its issuer or all factors affecting all instruments traded in the market.

As at 30 June 2016 and 31 December 2015, price risk arises on the Fund's investments in equities.

Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Fund has no interest bearing financial instruments except for cash and cash equivalents which are subject to normal market related short-term interest rates. Therefore, the Fund is not exposed to significant interest rate risks.

Currency risk

Currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates. Currency risk exposure arises from the Fund investing in financial instruments and entering into transactions which are denominated in currencies other than its functional currency. The Fund's exposure to foreign exchange movements as at 30 June 2016 and 31 December 2015 is as follows:

Credit risk

Credit risk is the risk that a counterparty to a financial instrument will fail to discharge an obligation or commitment that it has entered into with the Fund. It arises from cash and cash equivalents and other receivables. The carrying values of financial assets (excluding any investments in equity instruments) best represent the maximum credit risk exposure at the reporting date and amounts to EUR 2,219,178 (31 December 2015: EUR 2,489,266).

Liquidity risk

Liquidity risk is the risk that the Fund will encounter difficulty in meeting obligations arising from its financial liabilities.

The Fund's Prospectus provides for the monthly creation and cancellation of units and it is therefore exposed to the liquidity risk of meeting unitholders redemptions. The Fund's policy only allows for redemptions on the first business day of each calendar month. Additionally, a 10 business days notice period must be provided by unitholders wishing to redeem their holding in the Fund.

The Fund's listed securities are considered to be readily realisable as they are listed on recognised exchanges.

The Fund's other liabilities are short-term in nature.
