Data as of April 30, 2019

Number of participations 108,527  
NAV per participation 91.65

## Investment Objective

The fund seeks to invest in high quality businesses where temporary adverse circumstances have rendered the shares attractive from a valuation perspective. Higher quality businesses are more likely to grow and compound cash flow. Risk is identified not in terms of volatility or benchmark deviation but is a function of overpaying or overestimating a company's prospects. The Fund employs a high degree of conservatism on both these fronts. Consistency and patience are crucial to the successful implementation of the Fund's strategy. The holding of cash in the absence of opportunity simply makes sense. In seeking to outperform its benchmark, the Fund will invest primarily but not exclusively in European listed securities. Fund assets will be relatively concentrated as the portfolio will generally consist of 20-30 positions.
