Notes to the interim financial statements

1. GENERAL INFORMATION

Principia Fund N.V. (the “Fund”) is structured as an open-ended investment fund and was established in Amsterdam in April 2014. The Fund is a public company limited by shares (*naamloze vennootschap*) and is a legal entity under the laws of the Netherlands. The Fund is registered at the commercial register of the Chamber of Commerce of the Netherlands under number 60521945. The Fund commenced operations on 22 May 2014. The Fund has a registered office at Gustav Mahlerplein 3, Symphony Offices, 26th Floor, 1082 MS Amsterdam, the Netherlands. The most recent Prospectus of the Fund was issued in May 2018.

The shares of the Fund are divided in two series (“shareclasses”), Shareclass A and Shareclass B. The investment policy and risk profile of the Fund are equal for both shareclasses. Investors can invest in the Fund by obtaining depository receipts (“units”) representing an interest in Shareclass A (“A units”) or Shareclass B (“B units”). Units will be issued by the Foundation, who will be the legal owner of the shares represented by the units. The units of the Fund will be issued in two series (“unitclasses”), Unitclass A and Unitclass B. The units in Unitclass B are only available for subscription by persons working for the Fund Manager or related to the Fund. All other persons can subscribe for units in Unitclass A. As at 30 June 2019 and 31 December 2018, both Unitclass A and Unitclass B units are in issue.

The investment objective of the Fund is to earn a higher return than the average of the world’s developed equity markets, as represented by iShares MSCI World UCITS ETF (Acc) Euro.

The Fund’s investment activities are managed by Privium Fund Management B.V. (the “Fund Manager”), with the administration delegated to Apex Fund Services (Netherlands) B.V. (the “Administrator”).

The Fund had no employees during the period ended 30 June 2019 and the year ended 31 December 2018.

The Fund Manager is subject to the supervision of the Netherlands Authority for the Financial Markets (“AFM”). On 22 July 2014, the AFM licence of the Fund Manager was automatically converted into an Alternative Investment Fund Managers Directive (“AIFMD”) licence by the AFM.

The interim financial statements have been authorised for issue by the Fund Manager on 19 August 2019.

2. SIGNIFICANT ACCOUNTING PRINCIPLES AND POLICIES

Basis of preparation

The interim financial statements of the Fund have been prepared in accordance with reporting principles generally accepted in The Netherlands (“Dutch GAAP”) and the statutory provisions contained in Part 9, Book 2 of the Dutch Civil Code and Dutch Accounting Standard 394. The interim financial statements have also been prepared in accordance with the requirements of the Dutch Financial Supervision Act (“FSA”), which came into force on 1 January 2007.

The interim financial statements are prepared on a fair value basis for financial investments, except those for which a reliable measure of fair value is not available. Other financial assets and liabilities and non-financial assets and liabilities are stated at amortised cost or historical cost.

Below and overleaf is a summary of the accounting policies of the Fund.

Functional currency

The interim financial statements are presented in Euro (“EUR”), which is the Fund’s functional currency.

Recognition and measurement

An asset is recognised in the balance sheet when it is probable that future economic benefits of the asset will flow to the Fund and the amount of the asset can be reliably measured. A liability is recognised in the balance sheet when it is probable that an outflow of resources embodying economic benefits will result from the settlement of a present obligation and the amount at which the settlement will take place can be measured reliably.

Notes to the interim financial statements

2. SIGNIFICANT ACCOUNTING PRINCIPLES AND POLICIES (*CONTINUED*)

Recognition and measurement (*continued*)

Income is recognised in the income statement when an increase in future economic benefit related to an increase in an asset or decrease in a liability has arisen that can be measured reliably.

Expenses (including value added tax ("VAT"), where applicable) are recognised in the income statement when a decrease in future economic benefit related to a decrease in an asset or an increase in a liability has arisen that can be measured reliably.

Estimates

The preparation of interim financial statements in conformity with the relevant rules requires the use of certain critical accounting estimates. It also requires management to exercise its judgement in the process of applying the Fund's accounting policies. If necessary, for the purposes of providing the view required under Section 362, subsection 1, Book 2 of the Dutch Civil Code, the nature of these estimates and judgements, including related assumptions, is disclosed in the notes to the interim financial statements in question.

Foreign exchange

Assets and liabilities denominated in currencies other than the EUR are converted to EUR at the exchange rates prevailing on the balance sheet date. Transactions in foreign currency are converted at the rates prevailing on the date of the transaction. Foreign currency exchange differences arising on translation and realised gains and losses on disposal or settlement of monetary assets and liabilities are recognised in the income statement.

Classification of units

The units of the Fund are classified as equity. These units are recognised and measured at the redemption amount. Any distribution of equity is recognised through equity.

Basis of valuation - policies in preparing the balance sheet

Financial investments are initially measured at fair value which is the fair value of the consideration given or received. Financial investments are subsequently re-measured at fair value.

The Fund measures the fair value of any security which is listed or quoted on any securities exchange or similar electronic system and regularly traded thereon using its last traded price on the relevant business day. If no trades occurred on such day, it will be valued at the closing price on the previous business day.

Gains and losses arising from fair value changes are calculated based on historical cost and recognised in the income statement as 'realised gains on investment in equities' and 'unrealised gains/(losses) on investment in equities'.

Receivables and prepayments

The value of accounts receivable and prepaid expenses will be deemed to be the full amount unless it is unlikely to be paid or received in full. Appropriate allowances for estimated irrecoverable amounts are recognised in the income statement when there is objective evidence that the asset is impaired. Cash is carried at face value.

Payables and accruals

Payables and accruals are included at fair value.

Cash

Cash comprises cash on hand and demand deposits. Cash also includes short-term, highly liquid investments that are readily convertible to known amounts of cash and which are subject to insignificant changes in value and are held for the purpose of meeting short-term cash commitments rather than for investment or other purposes.

Notes to the interim financial statements

2. SIGNIFICANT ACCOUNTING PRINCIPLES AND POLICIES (*CONTINUED*)

Statement of cash flows

The statement of cash flows is prepared according to the direct method. The statement of cash flows shows the Fund's cash flows for the period divided into cash flows from operations and financing activities and how the cash flows have affected cash funds.

For the purposes of the statement of cash flows, financial instruments at fair value through profit or loss are included under operating activities. Cash flows from financing activities include proceeds from subscriptions and payments for redemptions of shares of the Fund. As the nature of the Fund is to invest in financial instruments, all cash flows related to investments are classified as cash flows from operating activities.

Unitholders' equity

All references to net asset value ("NAV") throughout the interim financial statements are equivalent to unitholders' equity.

Principles for determining the result

The Fund recognises financial assets and liabilities on the date it becomes a party to the contractual provisions of the instrument. A regular way purchase and sale of investments is recognised using trade date accounting.

The changes in the value of the investments held by the Fund are accounted for in the income statement.

Dividends from equities are included at the date when they are declared. Dividend withholding tax is presented gross on the income statement.

Income and expenses are accounted for in the income statement on the accrual basis.

Subscription fees, where applicable, are included in the income statement.

Tax position

The Dutch tax authorities have granted a ruling confirming that the Fund is tax transparent. This implies that the Fund is not subject to corporate income tax. Distributions made by the Fund (for example in case of redemption by a unitholder) are not subject to dividend withholding tax.

16. FINANCIAL INVESTMENTS AND ASSOCIATED RISKS

The Fund's investment objective is to earn a higher return than the average of the world's developed equity markets, as represented by iShares MSCI World UCITS ETF.

The Fund attempts to achieve its objective by investing predominantly in global listed equities and is therefore exposed to all the risks and rewards associated with the equities selected. The Fund is actively managed and will likely differ materially from the benchmark in order to achieve its objective.

The Fund's activities expose it to a variety of financial risks: market risk (including market price risk, interest rate risk and currency risk), credit risk and liquidity risk.

Market risk

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate as a result of changes in market prices whether those changes are caused by factors specific to the individual security or its issuer or factors affecting all securities traded in the market. Market risk comprises market price risk, interest rate risk and currency risk. The Fund's market risk is managed through diversification of its investments.

Market price risk

Price risk is the risk that the value of the instrument will fluctuate as a result of changes in market prices (other than those arising from interest rate risk or currency risk), whether caused by factors specific to an individual investment, its issuer or all factors affecting all instruments traded in the market.

As at 30 June 2019 and 31 December 2018, price risk arises on the Fund's investment in equities.

16. FINANCIAL INVESTMENTS AND ASSOCIATED RISKS (CONTINUED)

Market risk (continued)

Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Fund has no interest bearing financial instruments except for cash at banks and amounts due from/to custodian which are subject to normal market related short-term interest rates. Therefore, the Fund is not exposed to significant interest rate risks.

Currency risk

Currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates. Currency risk exposure arises from the Fund investing in financial instruments and entering into transactions which are denominated in currencies other than its functional currency. The Fund's exposure to foreign exchange movements as at 30 June 2019 and 31 December 2018 is as follows:

It arises from cash and other receivables. The carrying values of financial assets (excluding any investment in equities) best represent the maximum credit risk exposure as at the reporting dates and amounts to EUR 631,994 (31 December 2018: EUR 443,306).

Liquidity risk

Liquidity risk is the risk that the Fund will encounter difficulty in meeting obligations arising from its financial liabilities.

The Fund's Prospectus provides for the monthly creation and cancellation of units and it is therefore exposed to the liquidity risk of meeting unitholders redemptions. The Fund's policy only allows for redemptions on the last day of each calendar month and notice of 10 business days must be provided.

The Fund's listed securities are considered to be readily realisable as they are listed on recognised exchanges.
