What is this product?

| | |
|---|--|
| Type | The Fund is a fund for joint account (in Dutch: een fonds voor gemene rekening). It is formed by and comprises a contractual arrangement governed by the terms of the Prospectus. The Fund is an Alternative Investment Fund within the meaning of Section 1:1 of the Financial Supervision Act and is managed by the Fund Manager. |
| Terms of the product | The Fund has no end date. The Fund Manager may terminate the Fund according to the terms of the Fund. |
| Objectives | The Fund invests in the shares of publicly listed biotech / life sciences companies. It invests in highly innovative companies that develop and market new medicines and to a lesser extent diagnostics and/or medical devices. The Fund has a focused portfolio, investing in approximately 20 companies. Within this focus it will ensure that the portfolio is diversified over different diseases, development phases and geographical areas. The Fund's objective is to make an average minimum annual net return (after deduction of costs) of 20%+ over the mid-term (4-5 years). |
| Intended retail investor | A Well-Informed investor who invests a minimum of EUR 100.000 in the Fund. The investment horizon of an investor is at least 5 years and an investor understands the risk of losing some or all of the capital invested. The minimum investment horizon is in line with the objective and investment strategy of the Fund. The investor understands the characteristics and risks associated with investing in the Fund. The Fund promotes social characteristics. In the context of the EU Sustainable Finance Disclosure Regulation (SFDR), the Fund is therefore classified as an Article 8 fund. |

What are the risks and what would I get in return?

Risk indicator

Risk-indicator

The risk indicator assumes you keep the product for 5 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less. The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. We have classified this product as 6 out of 7, which is a the second highest class.

This rates the potential losses from future performance at a high level, and poor market conditions could impact the capacity of the Fund to pay you. This product does not include any protection from future market performance so you could lose some or all of your investment. If we are not able to pay you what is owed, you could lose your entire investment.

Performance scenarios

What you get will vary depending on how the market performs and how long you keep the investment. The scenarios are illustration based on historical performance and certain assumptions. The stress scenario shows what you might get back in extreme market circumstances, and it does not take into account the situation where we are not able to pay you. The markets might develop very different in the future compared to the past.

| | | | | | |
|--------------------------------|--|---|---------|---------|---------|
| Recommended investment period: | | 5 years | | | |
| Investment example: | | €10.000 | | | |
| | | If you would sell after: | | | |
| Scenarios | | 1 year | 3 years | 5 years | |
| Minimum | Definition | There is no minimal guaranteed return. Your investments might lose its partial or entire value. | | | |
| Stress | Theoretical scenario | What you might receive after costs | €625 | €684 | €241 |
| | | Average return per year | -93,75% | -59,10% | -52,53% |
| Unfavourable | The worst valuation path of the priips. | What you might receive after costs | €4.038 | €5.583 | €5.549 |
| | | Average return per year | -59,62% | -17,66% | -11,11% |
| Moderate | The median valuation path of the priips. | What you might receive after costs | €10.350 | €9.895 | €9.040 |
| | | Average return per year | 3,50% | -0,35% | -2,00% |
| Favourable | The best valuation path of the priips. | What you might receive after costs | €14.097 | €15.016 | €12.876 |
| | | Average return per year | 40,97% | 14,51% | 5,19% |

Unfavorable scenario: This type of scenario occurred for an investment between March 2022 and May 2025.

Moderate scenario: This type of scenario occurred for an investment between December 2017 and February 2025.

Favorable scenario: This type of scenario occurred for an investment between August 2021 and December 2025.

The amounts shown include all costs of the product itself, (where applicable) but may not include all costs you pay to your adviser or distributor/and include the costs of your adviser or distributor. The amounts do not take into account your personal tax situation, which may also affect how much you get back. The stress scenario shows what you could get in return in extreme market conditions. If no product-specific information is available to determine the above mentioned scenarios, the historical performance of a comparable product will be used.

What happens if Privium Fund Management B.V. is unable to pay out?

The Fund's assets are held separately from Privium Fund Management B.V. A pay-out of the product's assets is thus not affected by the financial position or potential default of Privium Fund Management B.V. The Legal Owner holds the legal ownership of the Fund Assets as required by law.

What are the costs?

The person selling you, or advising you, about this product may charge you other costs. If so, this person will provide you with information about these costs, and show you the impact that all costs will have on your investment over time.

Costs over time

The tables show the amounts taken out of your investment to cover different types of costs. These amounts vary according to how much you invest, how long you hold the product and how well the product performs. The amounts shown here are illustrations based on an example of an investment amount and various possible investment periods. We assume that:

- The return of your investment in over the first year is equal to 0%. For other holding periods, we assume that the product performs as indicated in het moderate scenario, and
- €10.000 is invested.

Key Information Document (KID)

| | If you sell after: | | |
|------------------------------|--------------------|---------|---------|
| | 1 year | 3 years | 5 years |
| Total costs | €57 | €131 | €190 |
| Impact of the costs per year | 0,57% | 0,44% | 0,41% |

(*) This illustrates how costs will decrease your returns every year during the holding period. For example, the table shows that if you would exit after the recommended holding period, your average annual return is estimated to be -1,60% before charges and -2,01% after charges.

Composition of the costs

| One-off costs to enter or exit when investing €10.000 | | If you would exit after 1 year |
|---|--|--------------------------------|
| Entry costs | - Up to 0,00% of the amount you pay when you enter into this investment, potentially significantly higher in times of severe market stress. - To settle any costs and expenses incurred by the Fund in acquiring fund assets for the purpose of issuing shares. - All costs are (partly) in the benefit of the fund. | €0,00 |
| Exit costs | - Up to 0,20% of your investment before it is paid out to you, potentially significantly higher in times of severe market stress. - To meet any costs and expenses of the Fund incurred in disposing of Fund assets to repurchase the Shares. - All costs are (partly) in the benefit of the fund. | €20,00 |
| Ongoing costs that will be charged each year | | |
| Management fees and other Administration and Operational costs | 0,31% of the value of your investment per year. This is an estimate based on the actual costs of the past year. | €31,00 |
| Transaction Costs | 0,06% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary according to how much we buy and sell. | €6,28 |
| Incidental costs charged under certain conditions. | | |
| Performance fees | 0,00% of the Net New Appreciation, if any, achieved by the Fund during the performance period, subject to a high water mark limitation. | 0,00% |
| Carried Interest | The impact of carried interest. Not applicable for this fund | N/A |

How long should I hold the investment and can I take money out early?

Recommended holding period: 5 years

Units can only be sold on fixed sales dates, with appropriate prior notice and subject to fund terms and conditions. A partial sale of participations is not possible if the outstanding participations of the participant have a value that is not at least equal to the minimum investment size, unless discretion has been granted by the Fund Manager. Participations cannot be sold when calculation of the NAV is postponed.
