Date	June 30 2026
Form	The Fund is an alternative investment fund (AIF)

Warning. You are about to purchase a product that is not simple and may be difficult to understand.

What is this product?

Type	The Fund is a fund for joint account (in Dutch: een fonds voor gemene rekening). It is formed by and comprises a contractual arrangement governed by the terms of the Prospectus. The Fund is an Alternative Investment Fund within the meaning of Section 1:1 of the Financial Supervision Act and is managed by the Fund Manager.
Terms of the product	The Fund has no end date. The Fund Manager may terminate the Fund according to the terms of the Fund.
Objectives	The Fund's primary objective is to achieve capital growth through global and long-term investments in listed companies (long-only). The primary factor that determines the return is the price development of the companies in which it invests.
Intended retail investor	An investment in the Fund can only be made for a minimum initial investment of EUR 10.000.000 as long as that the amount is provided in a lump sum. The product is intended for investors who have an investment horizon of at least five years and who accept the risk of losing all or part of the amount invested. The minimum investment horizon is consistent with the Fund's objective and investment strategy. The investor understands the characteristics and risks associated with participation in the Fund and can make an informed investment decision based on this. The Fund takes ESG risks into account in its investment decision. The Fund is therefore classified as an Article 6 fund for the purposes of the EU Sustainable Finance Disclosure Regulation (SFDR).
Essential characteristics	A. The investment fund only invests in listed shares and other investment funds or holds the assets in a cash account. B. The investment fund is actively managed, C. The shares in the investment fund are tradable on a bi-monthly basis (subscription) and on a monthly basis (redemptions). D. The investment fund aims to provide capital growth whereby investments can be made in global equities. E. The investment fund has not selected a benchmark as a reference and therefore has complete discretion within the limits of the prospectus. F. Dividends will be primarily reinvested in the investment fund. G. The investment fund does not invest in bonds. H. The fund is not a structured investment fund.
Risks	Several risk factors may impact the valuation of the underlying investments such as but not limited to: A. Market risk: the risk that the value will fluctuate over time; B. Illiquidity risk: the risk that the product cannot be traded or is difficult to trade. C. Currency risk: the risk of a change in the value of the currency in which the investment is made. D. Concentration risk: the risk of change in value due to limited diversification across various risk factors. E. Leverage risk: the risk of greater price movements the greater the leverage.
Name depositary	Apex Depositary Services B.V.

Other information, prospectus and annual report	Further information about the Fund, copies of the Fund's prospectus (detailing the Fund's investment strategy and objectives in section 11) and the most recent annual report are published and available free of charge on the website of the Fund Manager (www.priviumfund.com). This information and documents are available in the English language. Other practical information, including the latest unit prices, is also published on the website of the Fund Manager.

What are the risks and what would I get in return?

Risk indicator

Risk-indicator

The risk indicator assumes you keep the product for 5 years.The actual risk can vary significantly if you cash in at an early stage and you may get back less. You may not be able to easily sell (terminate) the product or you may have to sell (terminate) at a price that has a significant effect on how much you get back.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. We have classified this product as 6 out of 7, which is the second highest class.This rates the potential losses from future performance at high level. The possibility the fund cannot pay you back due to poor market conditions is therefore indicated as high. This product does not include any protection from future market performance so you could lose some or all of your investment. If we are not able to pay you what is owed, you could lose your entire investment.

Performance scenarios

What you get will vary depending on how the market performs and how long you keep the investment. The scenarios are illustration based on historical performance and certain assumptions. The stress scenario shows what you might get back in extreme market circumstances, and it does not take into account the situation where we are not able to pay you. The markets might develop very different in the future compared to the past.

Recommended investment period:			5 years		
Investment example:			€10.000		
			If you would sell after:		
Scenarios			1 year	3 years	5 years
Mininum	Definition	There is no minimal garanteed return. Your investments might lose its partial or entire value.			
Stress	Theoretical scenario	What you might receive after costs	€563	€541	€171
		Average return per year	-94,37%	-62,18%	-55,69%
Unfavourable	The worst valuation path of the priips.	What you might receive after costs	€563	€1.779	€5.299
		Average return per year	-94,37%	-43,76%	-11,93%
Moderate	The median valuation path of the priips.	What you might receive after costs	€12.045	€14.643	€10.669
		Average return per year	20,45%	13,56%	1,30%
Favourable	The best valuation path of the priips.	What you might receive after costs	€16.974	€23.639	€20.944
		Average return per year	69,74%	33,21%	15,93%

Unfavorable scenario: This type of scenario occurred for an investment between November 2022 and December 2022.
Moderate scenario: This type of scenario occurred for an investment between June 2018 and December 2023.
Favorable scenario: This type of scenario occurred for an investment between October 2021 and December 2025.

The amounts shown include all costs of the product itself, (where applicable) but may not include all costs you pay to your adviser or distributor/and include the costs of your adviser or distributor. The amounts do not take into account your personal tax situation, which may also affect how much you get back. The stress scenario shows what you could get in return in extreme market conditions. If no product-specific information is available to determine the above mentioned scenarios, the historical performance of a comparable product will be used.

What happens if Privium Fund Management B.V. is unable to pay out?

The Fund's assets are held separately from Privium Fund Management B.V. A pay-out of the product's assets is thus not affected by the financial position or potential default of Privium Fund Management B.V. The Legal Owner holds the legal ownership of the Fund Assets as required by law.

What are the costs?
The person selling you, or advising you, about this product may charge you other costs. If so, this person will provide you with information about these costs, and show you the impact that all costs will have on your investment over time.

Costs over time
The tables show the amounts taken out of your investment to cover different types of costs. These amounts vary according to how much you invest, how long you hold the product and how well the product performs. The amounts shown here are illustrations based on an example of an investment amount and various possible investment periods. We assume that:

- The return of your investment in over the first year is equal to 0%. For other holding periods, we assume that the product performs as indicated in het moderate scenario, and
- €10.000 is invested.

	If you sell after:		
	1 year	3 years	5 years
Total costs	€313	€1.025	€616
Impact of the costs per year	3,13%	2,96%	1,21%
(*) This illustrates how costs will decrease your returns every year during the holding period. For example, the table shows that if you would exit after the recommended holding period, your average annual return is estimated to be 1,04% before charges and -0,17% after charges.			

Composition of the costs

One-off costs to enter of exit when investing €10.000		If you would exit after 1 year
Entry costs	- Up to 0,00% of the amount you pay when you enter into this investment; potentially significantly higher in times of severe market stress. - To settle any costs and expenses incurred by the Fund in acquiring fund assets for the purpose of issuing shares.	Maximum €0
Exit costs	- Up to 2,00% of your investment before it is paid out to you; potentially significantly higher in times of severe market stress. - To meet any costs and expenses of the Fund incurred in disposing of Fund assets to repurchase the Shares.	Maximum €200
Ongoing costs that will be charged each year		
Management fees and other Administration and Operational costs	1,15% of the value of your investment per year. This is an extimate based on the actual costs of the past year.	€115
Transaction Costs	0,01% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary according to how much we buy and sell.	€0,71
Incidental costs charged under certain conditions.		
Performance fees	25% of the Net New Appreciation, if any, achieved by the Fund during the performance period, subject to a high water mark limitation.	25%
Carried Interest	The impact of carried interest. Not applicable for this fund.	N/A

How long should I hold the investment and can I take money out early?
Recommended holding period: 5 years
Units can only be sold on fixed sales dates, with appropriate prior notice and subject to fund terms and conditions. A partial sale of participations is not possible if the outstanding participations of the participant have a value that is not at least equal to the minimum investment size, unless discretion has been granted by the Fund Manager. Participations cannot be sold when calculation of the NAV is postponed.
