Investment Objective Strategy One Fund

Strategy One Fund has a three to five year investment horizon. The Fund invests in a mixture of stocks, bonds and funds that are diversified amongst themselves. The investment allocation has two main characteristics: firstly, allocation is fairly dynamic among asset classes in an attempt to capture opportunities that emerge periodically. The second feature is a clear preference to fund managers that have been known to the team for many years. Due to the longstanding relationship with some of these managers and the economies of scale, Strategy One Fund has an opportunity to invest in funds and shareclasses that are not open to most private investors, saving the unit holder considerable costs. The Fund is actively managed and does not use a benchmark index.

Track Record* Past performance does not predict future returns. Data is retrieved from the Administrator and/or Bloomberg.

%	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec	YEAR

* The track record prior to the launch of the fund (May 1, 2012) relates to the unaudited performance of the total personal portfolio of Hein Jurgens, drawn from historical records. The performance is net of brokerage and custody fees as they were charged. The performance does not take Investment Fund costs into account. This historical track record is for illustration purposes only. The fund performance is based on the returns of the initial series A.

Monthly comment

Financial markets continued their upside trajectory as market participants envisage peak interest rates in the US and Europe. Chinese markets also got a boost as government announced proposals to stimulate the economy. Commodities fared well on the back of the weakening US dollar.

Within your fund there were few losses. All our individual security investments announced positive results except for our small investment in Heineken, which surprised the market with a negative sales comment. Interest rate sensitive stocks like LondonMetric performed well. Best performance came from Fidelity China, up 12% on the back of news of possible new stimulus.

We are assuming a degree of volatility over the next few months as the Federal Reserve and other central banks around the world do not want to commit to firm statements with regards to the interest rate trajectory. We are as mentioned before invested in very defensive securities and the discounts in our listed funds are still at all time highs, which we expect to reverse in due course.
